

Roof lantern – Recess Survey

Survey dimension sheet - all dimensions should be measured from inside. If possible measure in mm and give dimensions to the nearest 5mm. If you want to fit sails into the roof section complete the Conservatory survey for the same shape - this is usually Georgian double hipped.

	<p>Main Plan Dimensions</p> <p>The most important dimensions are the overall length and width of the space. Measure both the width (X1) and the length (Y1) inside the vertical recess.</p> <p>X1 = Y1 =</p>
	<p>Heights</p> <p>H1 is the depth of the recess - measure the full depth of the recess including any trim.</p> <p><i>H2 is from the floor to the underside of the recess (optional)</i></p> <p>H1 = H2 =</p>
<p>Additional Dimensions: Use this section to include dimensions for any obstructions e.g.: any lights that hang within the recess - please also include at least one photograph.</p>
